## Phosphorus Removal

# Your Source for Safe, Clean Water

## Phosphorus Removal:

Let Hawkins Water Treatment Group come out and jar test for phosphorus removal.

Upon completion of the testing we will give you a detailed document of our testing and the results. Even if you have a good phosphorus removal program currently, let us see if we can give you a better result or financial option.

We have the ability to custom blend a product that will give you the best results.

In addition, Hawkins will have somebody onsite to assist with setting up a trial or to help with other water quality issues such as: BOD, COD, NH4, TSS, Settling

### Steps for phosphorus removal:

1. Test your water
2. Determine the phosphorous level
3. Recommend and review treatment options
4. Apply treatment
5. Monitor water

Phosphorus removal improves water quality

**We Can Help!**

**800-328-5460**

[www.hawkinsinc.com](http://www.hawkinsinc.com)

**DOMESTIC  
MANUFACTURER**

**Our state-of-the-art manufacturing practices allow us to produce the highest quality products in the water treatment industry.**

Over 98% of the water treatment chemicals we provide are made in the USA.

## Why Phosphorus Removal?

**Eutrophication:** The process by which a body of water acquires a high concentration of nutrients, especially phosphates and nitrates. These typically promote excessive growth of algae.

As the algae die and decompose, high levels of organic matter and the decomposing organisms deplete the water of available oxygen, causing the death of other organisms, such as fish.

### Delivering the quality service you're looking for:

- Our drivers are skilled technicians trained to provide on-the-spot service with the **ability to troubleshoot and repair chemical feed equipment in the field.**
- We have an inventory of parts and loaner feed equipment available on our delivery trucks if needed.
- Hawkins and your Sales/Service Representative are available **24 hours a day, 365 days a year** to meet your needs. Hawkins has and will continue to aid customers with emergencies that could occur.
