AgriHawk HOCl+ and Sodium Hypochlorite (Bleach) and The Rapid Mix System

- *Hawkins comes to your location to help solve site specific problems.*
- *These products were designed in coordination with some of the major U.S. livestock producers.*
- *The AgriHawk Rapid Mix System is a chemical feed system that is customized to your location(s).*

Sample + Analyze = Custom treatment designed specifically for your farm

Treatment recommendations are verified by our WatSim program. WatSim (Water Simulation) laboratory analysis provides a more complete picture of problems and potential problems confronting a water treater. You'll get a custom water disinfection program based on the WatSim source water profile. This includes:

- *A specific, customized solution to ensure that an accurate water treatment is applied*
- *Hawkins will install the right equipment and provide the proper chemicals*
- *Hawkins will provide support and assistance with field adjustments to dial in proper pH and disinfection levels*

Delivering the quality service you can depend on:

- Quality service matters and makes a difference. Hawkins comes directly to growers and services their barns.
- We understand the importance of biosecurity protocols and take precautions.
- Hawkins services hundreds of swine barns with weekly deliveries.

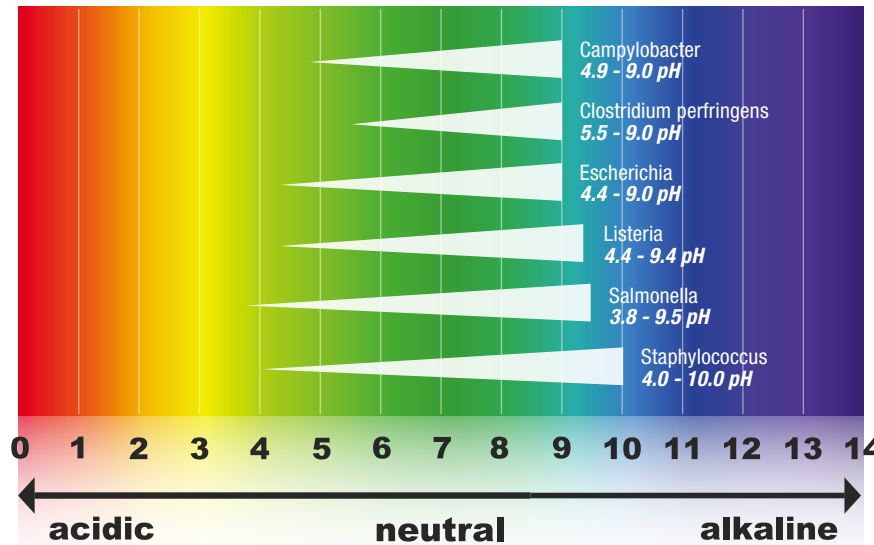

EQUIPMENT

- Full line of new chemical injection pumps
- Assorted plumbing parts for installation
- Various new chemical metering and measurement units and sight-glasses
- Assorted sizes of bulk chemical storage tanks
- Control and monitoring systems
- Safety equipment
- Testing equipment
- Spill containment systems

pH scale

Low to high growth rates are represented by the triangle shape.
