

Start Saving Time and Money

With products scientifically
selected for results that
will work for **You!**

- ♦ Aqua Hawk MB-SR 10X
- ♦ Aqua Hawk MB-WW
- ♦ Aqua Hawk MB-CS 10X
- ♦ Aqua Hawk MBS-502
- ♦ Aqua Hawk MB-FOG

These products contains a broad spectrum of microorganisms, micronutrients and bio-stimulants selected to break down the organic material such as: fats, oils, grease, starches, proteins and other substrates that can accumulate in lift stations.

Lift Station Treatment Program

SOLIDS, FOG and ODOR Treatment
Designed Specifically for Your Needs

Do Solids, FOG and Odor have you down?
Start LIFTING your spirits by reducing your costs
with Hawkins' Lift Station Treatment today!

Common Challenges

PUMPING, JETTING, and CLEAN-OUT COSTS

Solids, Fats, Oils & Grease (FOG) can build up in lift stations and sewer lines which require physical removal from the system at a high cost.

CORROSION & EQUIPMENT FAILURE

Solids and FOG buildup can cause failure of equipment. Additionally, they lead to production of H₂S and biological acids that severely corrode mechanical and electrical components.

ODOR COMPLAINTS

Complaints from the community and operator safety are prevalent issues in lift stations and force mains due to the formation of H₂S and biological acids.

COSTLY CHEMICAL TREATMENT

Common chemical treatments for odors, H₂S and FOG are costly and require specialized equipment and labor to manage. Most importantly chemicals don't address the issues; just push them downstream.

Hawkins' Lift Station Treatment program will keep your lift stations running smoothly.

Proven to save facilities time and money
in the fight against lift station challenges.

Valuable Solutions

REDUCED PUMPING, JETTING, & CLEAN-OUT COSTS

Our biological treatment will digest solids and FOG preventing them from becoming problem causing buildups.

PREVENTS CORROSION & EQUIPMENT FAILURE

Digestion of solids, FOG and organic acids while stopping H₂S formation eliminates costs associated with corrosion and equipment failure.

IMPROVED SAFETY and FEWER ODOR COMPLAINTS

Digestion of organic acids and prevention of H₂S results in improved human safety and less discomfort to the community.

AVOID COSTLY CHEMICAL TREATMENT

Supplying a solution that prevents challenges at the source before they form with reduced labor and no capital investment.

PROGRAM APPROACH

1. Our Service Reps perform a complete system survey.
2. We provide training and support for operators on where, when and how to apply product.
3. We ensure that SUCCESS is measured and documented.
