

Mining Industry Water Treatment

Addressing Today's Challenges & Minimizing The Impact Of Mining

How can Hawkins help?

- Asset protection
- Environmental Compliance
- ROI
 - Energy savings
 - Water savings
 - Productivity enhancement
 - Reduced wastewater costs

Key Product Lines:

- Wastewater treatment
- Tailings management
- Dust control
- Advanced dewatering
- Improved recovery of leached metals
- Acid Mine Drainage (AMD)
- Pond treatment
- Thickener treatment
- Corrosion and scale control
- Process water

Water Treatment for Maintaining Compliance:

- Government regulations
- Environmental policies
- Industry standards

We take seriously the environmental rules that regulate many practices. Our water treatment expertise and proven solutions effectively solve your water treatment issues and help you stay in compliance.

Bottom line: You'll get environmental, economic, and operational benefits that keep everyone happy.

Additional Treatment Products:

- Polymers
- Flocculants
- Coagulants
- Antiscalants / Scale Inhibitors
- Absorbents
- Phosphates
- Demulsifiers
- Dispersants
- Defoamers
- Settling Aids
- Dewatering Polymers
- Biological Nutrients/Augmentation Aids
- Disinfection Chemicals
- Odor Control
- Dechlorination Chemicals
- Phosphorus Removal
- Lagoon Sludge Reduction
- Antifoams
- Hydrogen Peroxide
- Viscosity Rheology Modifiers

And much more!

Specialized Service

Hawkins Technical Sales Representatives are well trained in setting up, maintaining and trouble-shooting mining water and wastewater treatment programs.

Your Hawkins Representative Can:

- Develop tailored treatment programs for your facility
- Ensure that metering pumps are accurate
- Calibrate chemical feed scales
- Help you optimize chemical feed systems
